

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 92-10064

Keg gripper - (Mechanical) - [70]kg

Weight (kg)	7.852
Maximum capacity (kg)	70
Type of lifting object	Keg
Industry	Beverage industry
Height (mm)	570
Configuration height (mm)	-551

Our beer keg gripper grips under the keg's handles and lifts it, quickly and without effort. Many breweries lift and stack hundreds of kegs each day. Often, the lift is performed manually, resulting in a physically demanding situation for the person that is lifting. Our keg gripper is powered by the compressed-air cylinder the Bal-Trol, that makes the load essentially weightless. It can lift kegs of different weights up to 70 kilos. This enables everyone in the workforce to lift and transport heavy kegs.

Adaptable beer keg gripper

Lifts All's lifting tools are always adaptable according to the customer's needs. The beer keg gripper can be used for lifting both kegs and tubes with handles. It is also possible to adapt the tools grip according to different sizes. In that sense, it is a versatile lifting tool that can be used within many different industries.

Innovative design

The standard beer keg gripper has a smart and compact design with several benefits:

- The keg gripper is designed to be small and easy to work with. It therefore does not take up any unnecessary workspace.
- It is equipped with a very simple control, consisting of four buttons for grip/let go and lift/lower. Learning how to operate it is done in no time!
- The keg lifter has a flexible grip allows it to lift kegs of various sizes.

- The handle is ergonomically positioned to provide optimal control and comfort in every lift.
- The green light indicates that the lifting tool has a correct grip, when it is off the load cannot be lifted.
- The gripper is equipped with a load guard to prevent drums from being dropped mid- air.
- As all of Lifts All's lifting tools the beer keg gripper fulfills the EU's health, environmental and safety directives for CE-marking.
