Pressure drop alarm 12 V DC

Volt (V)

220/240

The pressure drop alarm is used to ensure that the air pressure is correct for the lifting tool to function properly. If the pressure falls below 5.3 bar* (standard), the alarm is activated with a flashing red light and a loud siren. The alarm turns off when the air pressure reaches 6 bar.

- Easily connects to the air inlet and wall outlet.
- Compatible with all Bal-Trol units and gripper, as well as other types of equipment.
- Compressed air (R ¼" internal thread).
