

LIFT WITH EASE

Efficient and ergonomic
material handling

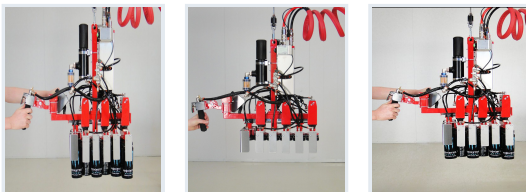

Item No.: 89-10541

Can gripper 89-10541

Type of lifting object	Can
Weight (kg)	25
Maximum capacity (kg)	8
Industry	Beverage industry
Serial number	5028
Gripping technique	Mechanical
Optional control	PSH

Gripper for aluminum and tin cans

With this gripper, the operator can lift drink cans from a pallet and move them to the display cabinet in an ergonomically-beneficial way (see video). Instead of lifting and moving the cans manually, and only two or three at a time, the user can now lift and move 24 cans (amounting to 8 kg) every single time. The vacuum can gripper makes the work fast, efficient and fun!

This gripper was developed for the specific purpose of lifting 24 cans at a time and placing them down in a certain position. This specific need (to realign some of the cans in mid-air, in order to fit them into the box in a specific way) was taken into consideration and incorporated in the design, mechanics and manufacturing of this gripper. Do you need a similar lifting tool? Contact us for more information.

The can gripper is custom-built for this purpose and is designed to move certain cans sideways so they fit into the box. Do you need a similar [Vacuum gripper](#)? Contact us more information.
