

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 89-11480

Drum gripper 89-11480

Type of lifting object	Barrel
Weight (kg)	145
Maximum capacity (kg)	100
Serial number	5822
Gripping technique	Vacuum
Optional control	PSH

A lifting tool for drums

This drum gripper is an ergonomically-designed lifting tool with the capacity to lift drums up to 100 kg. By gripping the drum from its top with a suction cup, the lifting tool can easily lift and rotate both big and small drums. This eases the handling for the user who now has a more ergonomically-beneficial working position, which reduce the wear-and-tear and other work-related injuries dramatically.

Suitable for clean room environments

[The vacuum gripper](#) is especially customised to meet the requirements for material handling in clean-room environments. For example, the exterior of the lifting tool is made of polished stainless steel, and all welded joints are grinded and polished to ensure that the lifting tool is easy to clean, thus eliminating the risk of dust accumulation. All the external details, such as the suction cups, are customised to meet cleanroom standards.
