Type of lifting object	Furniture
Weight (kg)	30.3
Maximum capacity (kg)	30
Serial number	A6573
Function	Tilt
Optional control	PSH
Gripping technique	Mechanical

Gripper for bed frames

Our bed frame gripper is used in the furniture industry to lift and tilt bed frames or slatted bases weighing up to 30 kg. During the manufacturing process, the operator moves the bed frames from a machine and stacks them on a pallet. With the help of the lifting tool, the operator can lift, tilt, and stack the bed frames on their own. This means that they can work independently, without having to ask colleagues for help. In this way, the workplace maintains its pace and employees can work more freely. A heavy and awkward job becomes easy and smooth.

Suits different sized bed frames

The arms of this lifting tool is designed to suit bed frames of different widths. So, the operator can lift both small and big bed frames without needing to change lifting tools.

If this lifting tool does not suit your manual handling or load, we can customize a gripper for your needs. Contact us for more information about a lifting system for you.
