material handling

Item No.: 89-12045

Weight plates gripper 89-12045

Type of lifting object	Other
Weight (kg)	15.7
Maximum capacity (kg)	25
Serial number	A6588
Optional control	PSH
Gripping technique	Mechanical

Weight plates gripper

This gripper for weight plates is used in a factory that lifts rubbered steel weights during the manufacturing process. The lifting tool is developed for industries that need to lift gym weights, dumbbell plates and other types of metal plates. The tool grips around the edges of the weights and can easily be adjusted to suit plates of different sizes. As a result, the operator can use the same lifting tool to lift different kinds of weight plates, without changing gripper.

Safe and secure lifting equipment

When you are using a lifting tool to lift heavy objects, safety is of the essence. This lifting tool is equipped with a load guard that makes it impossible to release the load mid-air. Moreover, it has a two-hand grip that makes the operator use both hands when he or she releases the weights. Consequently, the operator remains safe and avoids the risk of pinch injuries.
