

LIFT WITH EASE

Efficient and ergonomic
material handling

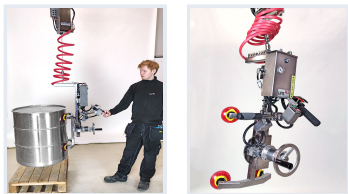

Item No.: 89-12055

Drum lift 89-12055

Type of lifting object	Barrel
Weight (kg)	16.5
Maximum capacity (kg)	25
Serial number	A6609
Function	Manual rotation
Other characteristics	Stainless steel (SS)
Gripping technique	Vacuum
Optional control	PSH

Lifts All's drum lift utilizes vacuum technology to grip and lift drums up to 25 kg. A safe and energy efficient way of moving the load wherever you need to, without physical effort. Besides lifting drums the drum gripper can also lift containers, kegs and barrels. To lift, the operator simply presses a button. The drum hangs weightlessly in the air which makes it easy to move to the desired location. To move the drum vertically, for example up on a shelf or onto a pallet, the Pro Speed-Handle's levers provide controlled and smooth movements.

Drum lift that lifts and empties barrels

It can be challenging to empty larger drums manually without a lifting tool. This vacuum lifting tool has a wheel with which the operator tilts the drum mid-air, for example to empty the drum of its contents. The function can also be used to place down the drum horizontally. All while the operator stands comfortably without having to bend.

Lifting tools for sensitive environments

This particular drum lifter is made of stainless steel, but it is also available with a painted finish. Stainless steel has the advantage of being both durable and easy to clean. This makes it practical for use in cleanroom environments or in businesses that handle food and beverages. The drum lifter can also be customized to meet specific industry requirements, for example, if you need to lift chemicals.
