Maximum capacity (kg)	80
Industry	Wood and furniture industry
Serial number	A6861
Function	Tilt
Gripping technique	Mechanical
Optional control	PSH

Work more efficient with a door gripper

With this door gripper, you can easily and effortlessly lift doors up to 80 kg. This mechanical door gripper clamps on the door stiles (long side of the door) and in this way grips the door securely. Once lifted off the ground, you can also tilt the door. Now it is possible to move the doors with precision and accuracy.

For the operator, this gripper removes the element of heavy lifting from the work, and the operator can work ergonomically. Doors can be awkward to lift on your own and usually require two people to lift. With this lifting solution, one person easily gets the job done on their own, which makes work more efficient. The gripper is especially useful in facilitating assembly work since it is very easy to maneuver.

Customized door gripper

We tailor the lifting tool to your needs, for the load you want to lift, and how you want to lift it. We can adjust the maximum load capacity, tilt and rotation functions, and how the tool should grip the load depending on how you want to maneuver it. It is possible to adapt the gripper to lift doors of different shapes and sizes. You can also use it to lift different products such as frames, boards, planks, and other types loads. Read more about our other grippers for doors, panels and frames [here](#).
