

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 89-12562

Gripper for stands 89-12562

Type of lifting object	Tripod
Weight (kg)	18
Maximum capacity (kg)	36.5
Serial number	A7694
Gripping technique	Vacuum
Optional control	PSH

This vacuum gripper is designed to provide simple, safe, and ergonomic handling of stands and similar supporting structures. The operator inserts the tool inside the stand, where a powerful suction pad grips directly at the bottom, making the lift smooth and stable

The solution uses vacuum technology, meaning that it relies on the pressure in vacuum cups to grip the load. It is powered by a pneumatic cylinder that makes the load both weightless and easy to maneuver.

Advantages

- **Efficient handling:** Adjustable lifting speed up and down gives you full control.
- **Load guard:** Impossible to release the load intentionally/unintentionally while in the air.
- **Quiet operation:** Low noise levels contribute to a better working environment.
- **Automatic center of gravity adjustment:** The stand is automatically balanced for safe and easy handling.
- **Maximum capacity 36.5 kg:** Strong enough for most tripods, without compromising on ergonomics.

Customized lifting aid

The stand gripper is an example of Lifts All's customized lifting tools. Do you have other loads you want to lift, in a different size or weight than these stands? We can redesign and adapt the tool to meet your specific needs.
