

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 2490

Case gripper 2490

Type of lifting object	Can
Weight (kg)	21.5
Maximum capacity (kg)	80
Industry	Beverage industry
Serial number	2490
Gripping technique	Mechanical
Optional control	Balancing

Our case gripper is a popular choice for customers in the beverage industry because the user can move cases from pallet to pallet very easily and efficiently. Instead of manually lift and moving each case individually, and risking repetitive strain injuries, the case gripper can do the job for you. This lifting tool can pick up a stack of nine (9) cases at a time. That's 80 kg that would otherwise have to be lifted manually.

The case gripper utilises 'balancing' mechanics to equalise the weight of the gripper and the load. This means that the load is moved up and down by a slight pulling at the handles. With a press of a button, the load achieves a state of weightlessness that allows the user to manoeuvre it in any direction while maintaining precision and accuracy.
