Item No.: 3328

Combi-gripper for batteries 3328

Type of lifting object	Battery
Weight (kg)	7
Maximum capacity (kg)	64
Industry	Battery industry
Serial number	3328
Optional control	PSH
Gripping technique	Station wagon

Multi-faceted lifting tool for batteries

Our combi-gripper is customised to lift different sized batteries up to 64 kg. The main advantage to this gripper is that you can change the lifting application depending on the type of battery that needs lifting. The applications are designed to lift the different models and changing applications only take a few seconds! One application is mechanical and grips by clamping the battery, the other application is vacuum-based and attaches to the side of the battery. The green eye on the gripper indicates that the battery is firmly attached and can be safely lifted. The combi-gripper is suitable for working places that do not need to lift continuously, or in places where space is limited.
