

LIFT WITH EASE

Efficient and ergonomic
material handling

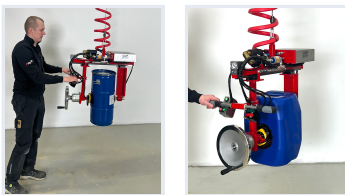

Item No.: 89-12270

Container gripper 89-12270

Function	Manual rotation
Weight (kg)	35
Gripping technique	Vacuum
Maximum capacity (kg)	50
Type of lifting object	Container, Drum
Optional control	PSH

Function and use

Lifts All's container gripper is a user-friendly lifting tool for the safe handling of drums and containers that need to be rotated and emptied. The tool gives the operator full control when lifting, turning, and emptying, which contributes to a more ergonomic and efficient work process. With a pneumatic lift (compressed air-driven), the load can be positioned precisely and the contents poured out in a controlled manner.

Security and control

The mechanical grip on the long sides, combined with a built-in sensor for secure gripping, ensures that the load is correctly secured before lifting begins. The design is engineered for stable handling throughout the entire movement, reducing the risk of spillage from the container.

Robust construction and smooth maneuverability

The barrel gripper has a robust construction with hardened swivel casters on one side and fixed wheels on the other for increased stability during work. Lifts All's drum lift is a reliable solution for businesses that place high demands on safe, controlled, and efficient handling of drums and containers.
