

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 89-12356

Gripper for gas cylinders 89-12356

Weight (kg)	22.5
Maximum capacity (kg)	100
Gripping technique	Vacuum
Optional control	PSH
Type of lifting object	Gas cylinder

Gripper for gas cylinders - safe, energy-efficient and precise handling

This lifting solution for gas cylinders is developed for safe and ergonomic handling in demanding industrial environments. With intelligent vacuum technology and several built-in safety functions, it gives the operator full control while minimizing the risk of accidents

Our gas cylinder lifting tool is equipped with several safety features:

- The gripping tool is powered by compressed air instead of electricity. There are no ignition sources in the gripping tool.
- Handling gas cylinders is a sensitive operation. The cylinders must not be exposed to impacts or shocks. The gripping tool for gas cylinders is designed to handle the load gently and safely, and includes load protection that ensures slow lowering of the load if the pressure in the system drops.
- The gripping tool uses vacuum cups for gripping instead of mechanical clamps. As a result, the gas cylinders remain undamaged and free from scratches and marks.
