MaxiCrane Mini - (3) m - [100] kg SS316

| | |
|-----------------------|----------------------|
| Length (m) | 3 |
| Maximum capacity (kg) | 100 |
| Bal-Trol assembly | During |
| Other characteristics | Stainless steel (SS) |

The MaxiCrane Mini Stainless is a compact, rotating Articulated jib crane an electropolished stainless steel finish. It has the same lifting capacity as the MaxiCrane, 100 kg, but a shorter boom of three meters. It is particularly suitable for environments with high demands on hygiene and corrosion resistance, as well as for workplaces with low ceiling heights where a standard crane cannot fit.

Quiet and smooth-operating lifting arm in stainless steel

Its low weight, combined with low-friction bearings in the joints, makes the MaxiCrane Mini Stainless very quiet and easy to operate. The electropolished surface is not only easy to clean but also provides enhanced resistance to corrosion and wear.

Lifts All's lifting aid not only protects your back, but also saves time and money. Thanks to the crane's compact size and light weight, it's also quick and easy to install at a low cost. It mounts easily at any height, clamped to a steel post.

Low-profile Articulated jib crane hygienic and confined spaces

The smart design of the outer boom, featuring a built-in Bal-Trol, makes the crane very low-profile, allowing it to fit even in very confined spaces. At the same time, the operator gets maximum lifting height. The MaxiCrane Mini Stainless can be equipped with various lifting tools, such as a hook for buckets, Vacuum gripper cartons, or gripper mechanical gripper lifting and turning rolls. The grippers are custom-made to optimize your handling process and can be changed by the user in just a few minutes. It's that simple!
