

LIFT WITH EASE

Efficient and ergonomic
material handling

Item No.: 95-Equalizer

Equalizer

Optional control

PSH

The drum gripper is a lifting tool that uses a Bal-Trol, a pneumatic cylinder, to make the loads weightless. Instead of carrying heavy drums manually, the operator can use the lifting tool to lift and carry the weight of the load. By doing so, a comfortable and ergonomic working environment is created - one where employees remain healthy and work contentedly in the long run. Manually carrying 60 kg once is often no problem, but repeated lifting can often result in wear-and-tear injuries that affect life.
